

# The Five Steps from the Idea to the Production of Your Custom Solidarity Textiles

## 1. Briefing

Download and fill out our design briefing template and send it back to us. Please indicate when the textiles must be with you at the latest so that we can create a corresponding design and production schedule.

## 2. Choosing a designer

Based on your briefing, we screen our network for the right person and usually send you a draft within three weeks.

## 3. Feedback

You check the draft and either get back to us with a) your approval or b) your collected change requests. Depending on whether a) or b), there will be another round of feedback or not.

## 4. Print Preview

After you have approved the design, we will create a digital print preview for you. The preview serves to double check everything including the positioning of the design on the textile and the colours used.

## 5. Production

As soon as you have approved the print preview, we will start production and inform you as soon as the shipment has taken place. Voila!
