dna merch

SOLIDARITY TEXTILES FOR GOOD WORKING CONDITIONS IN THE GARMENT INDUSTRY

"DNA MERCH" is an unconventional social enterprise from Berlin. Together with a self-managed and worker-owned cooperative in Croatia, we produce and design organic cotton t-shirts and much more for you. Buying fair and being active against exploitative fashion corporations at the same time? With dna merch this is possible because we use a fixed percentage of our proceeds to support garment workers in their union struggles for better working and living conditions. Thus, anyone who supports us is standing in solidarity with workers in both the Global South and the Global North!
